MDT Build Lab

Task Sequence Übersicht Also was soll beim Deployment passieren

Task Sequence Anpassung

 Die silbernen NUCS brauchen anscheinend eine BIOS System Reserved Partition

 Dies wurde auf 1GB vergrößert, da sonst die Installation fehlschlägt

Die 3 Buttons über dem Volumes Feld werden zum Anlegen neuer Partitionen, zum Editieren vorhandener und zum Löschen von PArtitionen gebraucht

System Reserved (Primary)

1 GB NTFS file system.

Windows (Primary)

99 % of remaining space on disk. NTFS file system.

Recovery (Recovery)

100 % of remaining space on disk. NTFS file system.

 Partitons Eigenschaften können mit dem mittleren Button aufgerufen werden

Auf dem Server fl-wx-deploy befinden sich im Firefox Lesezeichen die zur Erstellung der Configs beigetragen haben.

- Adobe Acrobat
- MS Office 2016 x64
